

Experimental cage treatments across space

Sea urchins

n=10 or n=20 4-5cm purple urchins
(*Strongylocentrotus purpuratus*)
within each cage

“Low” Kelp treatments

One young *M. pyrifera* sporophyte
Wet weight biomass ranged 10—130g

“High” Kelp treatments

Four young *M. pyrifera* sporophytes
Wet weight biomass ranged 100—330g

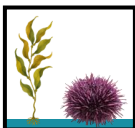

Cage controls

Eight levels of drift algae treatments

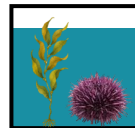

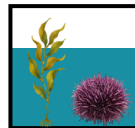

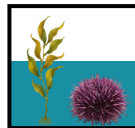

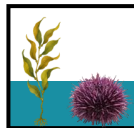

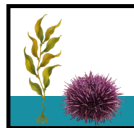

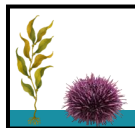

Blades of Giant Kelp (*Macrocystis pyrifera*)
Wet weight biomass ranged 10—330g

10g drift

330g drift

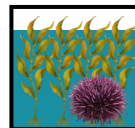

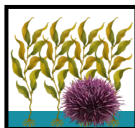

10g drift

330g drift

10g drift

330g drift

Low only;
no drift

High only;
no drift

Drift only;
no Kelp

Cage array

n=20 1 x 1 x 0.4m cages
Not to scale; one “urchin control” cage not
shown or analyzed
